

Good afternoon ladies and gentlemen

February 2019

Are you all right?

We have seen that you are dealing with large workpieces. Ev. is interesting following information for you.

- Heavy rollers: With a forging manufacturer, which makes for ABB rollers. He has his own annealed factory. [Today, it vibrates the rollers with our technology before the finish turning](#). The results are as during annealing. Only he saves today a few francs (thousand) it.

Please note:

- Siemens has 2 WIAP metal relaxation equipment.
- A relaxed [Vehicle undercarriages](#) because the glow is not, treat only MEMV.
- A relaxed gas turbines [Turbine rings](#), before finishing this be vibrated, then finished filming and lasered it. Annealing can not. Only MEMV vibrate. Without MEMV vibrate it discards after laser cutting.
- The fact that flame directed and hydraulically directed constructions when these are annealed after straightening, in the curved position back forgiven is annoying! [They see a remedy at this link: WIAP MEMV relax with vibration](#).
- We have expanded our product range:  
[4 different types vibrators](#)

Part of it to 5 tons to 200 other  
Tons unit weight.

- That we have a little experience with heavy parts. [look here](#)

In the following link Button you will find a completely new report over the metal MEMV relax with vibration.

Information [Brochure 12 pages](#) with photos

Last Current [2019 report](#)

Best regards / best regards
