

Good day, Zug

March 2019

Your name we have found on the Internet and allow us to provide you with the following information:

We have specialized in the metal relax with vibration MEMV called glow instead stress.

A new method was also designed to relax sheets. Sheets can be laid in bundles with vibration within about 1 hour; then these sheets from bending during laser cutting. Single sheets, for example, 10 mm, also go.

A recent study confirms it. A customer (CH Gross operation), MEMV has treated and laser cut MEMV treated sheets and compared. It works.

Question: Do you have someone in your company, where would care?
