Introduction of a new method WIAP MEMV metal relax with vibration

Good day to management

There are two variants for good processing results as an intermediate operation for precise component manufacturing.

The variant glow stress, or variant: **WIAP MEMV metal relax with vibration**. A component has finished mounting the exciter, usually in an hour.

- No scale
- Reduction of freight costs; it is expanded on site
- electricity savings
- An already painted component can be treated MEMV

Component sizes from 10 kg to 200 tonnes possible.

Ideal for:

- **Welded structures of all kinds.**
Cylinders, rings, flame directed or hydraulically directed shaped pipes. Sheet metal plates of 10 mm or in bundles.
aging cast designs artificial. Small cast designs on Mehrfachaufspannvorrichtung and more,
